PERMEABILITY ASTM E96 Water Vapor Transmission Rate: meets requirements

LOW VOC ASTM D5116/D5197/D6196: meets requirements

SPECIAL NOTE The silk designs are hand woven from homespun and hand dyed silk. As such, there may be stronger impurities and irregularities in color and texture within the roll and between the different rolls even if from one lot. This, together with the horizontal weave, will create a pleasant paneling effect on the wall. These variations are characteristic of these natural fabrics and enhance the nature of the fabric and cannot be considered a fault. There can be a variation between the sample material and the delivered product.

Please note that this material is not returnable.

ADDITIONAL PRODUCT ATTRIBUTES All dyeing, printing, laminating, finishing, etc., is totally water based

WARRANTY Manufacturer warrants that for a period of five years from the delivery of its wallcovering, products shall not separate from their backings when properly installed on a sound interior wall, adequately maintained and used under normal conditions
