Passes ASTM E84 (GRC) & NFPA 286

ENVIRONMENTAL

Low VOC. Meets California Section 01350 Indoor Air Quality Standard.

Can contribute to LEED® EQ 4.1 point for low-emitting materials, adhesives, and sealants if used with low VOC adhesives.

Can Contribute to LEED® MR 5.1 point for regional materials.

Manufactured using comprehensive raw material recycling.

Made with highly cleanable water-based inks.

Contains no cadmium or mercury-based pigments. Pigments are fade and alkali-resistant.

OTHER FEATURES

Made in the USA

Contains anti-microbial additives to resist the growth of mildew and bacteria and pass ASTM-G21. These additives will not prevent mold growth if residual wall moisture is in excess of 4% and/or is allowed to accumulate in or behind the walls. Perforation is available for enhanced permeability.

PRODUCT USE ADVISORY

This product is intended for use in buildings designed, monitored and regularly maintained to avoid moisture accumulation on or within walls, particularly in warm, humid climates. The features that make vinyl wallcovering cleanable and durable also render it very low in permeability. Vinyl wallcovering products should not be installed on walls that contain excessive moisture or are subject to moisture infiltration.
