

textile wallcovering

## ● assam silk

NATURAL WALLCOVERING		
<b>Width</b>	36" (91 cm)	<b>Fire Testing</b>
<b>Roll Length</b>	12 linear yards (10.5 meters) sold in 4 yard (3.5 meter) increments only	
<b>Backing</b>	recycled paper (35% of total product)	NFPA 255 / ASTM E-84 Tunnel Test: Class A  Flame Spread                25  Smoke Developed        40
<b>Facing</b>	100% silk	
<b>Special Installation Instruction:</b> To obtain a balanced effect across the wall, it is advisable to cut and arrange all the drops for one wall, prior to hanging. For best results all drops should be butt jointed, or overlapped and double cut.		

## What It Means To Be Green

Source One believes in conserving our planet for future generations.

These environmental and performance icons highlight specific qualities to guide you in choosing the wallcovering appropriate to your needs. Since there is no universal standard for environmentally correct materials, "green" must be defined on an individual basis, therefore each tip card may display different icons based on its material content or manufacturer.

Contact your Source One representative or go to [www.SourceOneWallcovering.com](http://www.SourceOneWallcovering.com) for more information.

	Biodegradable
	Made from annually renewable resources
	Treated with a water-repellent top finish
